

Dear director of the State Forensic Medicine Service in Vilnius

07.06.2010

I would like to thank well organized meeting that took place 04.06 - 05.06.2010 in Vilnius.

It was useful to hear presentations about actual issues of forensic medicine in Baltic States. Same time we improve our knowledge of aspects of sudden intrauterine death and mechanogenesis of blunt trauma.

I also hope that all participants had a good possibility to hear an overview of the work of the board members of European Council Legal Medicine

Marika Väli  
Professor of forensic medicine of the Tartu University  
Deputy director of the Estonian Forensic Science Institute

Dear Prof. Alvydas Pauliukevicius and dear colleagues,

I very appreciate your special hospitality in Vilnius and I would thank you for the invitation in so interesting Meeting in Forensic medicine; it was for me the first time in Lithuania, nevertheless I felt as if I were one of your, not abroad of my country and my family.

I reported this enthusiastic experience to my Institute and professor Procaccianti too; I hope this special occasion will be repeated in the next future, to contribute for collaboration between our institutes, also with regard for the colleagues of other countries of the Baltic; please send from me special regards to prof. Marika, because I don't have her address.

Any occasion of further, future cooperation on fields of interest will be accepted by us.

Looking forward to see you soon,

Sincerely,

Prof. Dr. Antonina Argo
